

## ◆ WHAT IS THE TELLY DTV PLAYER?

*Telly* turns notebooks, smartphones and tablets into HD Digital TV screens. *Telly* is a proven solution that allows a quick-to-market solution. *Telly* can be adapted to create a solution that meets customers needs. *Telly* is designed to work with internal and external tuners.

### FEATURES

Telly makes it possible to access contents that are part of Digital TV schema: High Definition, Standard Definition, 1SEG and Closed Caption (CC). Telly Electronic Program Guide (EPG) provides continuously updated menus displaying scheduling information for current and upcoming programming. Telly allows you to record your favorite programs, so you can go back and enjoy them again at anytime.

### GINGA NCL

The Digital TV standard adopted by most of the countries in South America includes Interactivity as one of its distinguished features. The specification of the middleware for interactivity is called Ginga. Ginga.go is an implementation of Ginga NCL specification developed by Digital Stream. Telly is integrated with Ginga.go to implement the interactive aspect of the ISDB-T standard.

### EWBS

Emergency Warning Broadcasting System (EWBS) is a feature of ISDB-T Digital TV system that makes it possible to notify receivers on an emergency situation. Telly can handle the Emergency Warning signal as described in the EWBS/ISDB-T standard.

### CROSS - PLATFORM

Telly is available in different platforms such as: Windows (BDA), Linux and Android. It supports most popular USB TV dongles on the market. Easy to install, easy to use, simple and intuitive user interface, it enables you to operate Telly DTV Player with ease.
